

How

your

donations

make

a difference

**ANTHONY
NOLAN**

Saving lives through stem cells

£40

Could add a new potential lifesaver to our register.

This includes the cost of recruiting a donor, collecting their sample, and analysing it to find out their tissue type.

£30

Could pay for an hour of a post-transplant nurse's time.

Our specialist nurses work in transplant centres around the country, offering invaluable expertise and support to our patients and their families.

£15

Helps our scientists conduct groundbreaking research.

From transforming the success of stem cell transplants to pushing the boundaries and discovering pioneering cell and gene therapies.

£5

Could get vital information to a patient.

We offer a range of information and support booklets to help patients and their families after a transplant.
